Service Bulletin

Date: Mar-2016

Brands: Husqvarna, Jonsered, Craftsman, McCulloch, Parton, Poulan Pro

Product: Dual Stage Snow Throwers, 200 series only

Dates Produced: June 1, 2014 to September 30, 2015

Warranty Reporting

Perform service/update through normal warranty process using only this information:

Action required: Service of unused units in your inventory is not required. Perform service/update through normal warranty process if a problem with the engine pulley occurs.

Component code: **816 – Pulley / Guide wheel**
Defect code: **92 – Part exchanged on request by Husqvarna**

Warranty type: If problem occurs and unit has been sold to a customer, use:
1 – warranty
If problem occurs and unit has not been sold to customer, use:
04 – requested by factory

Text: Reference Service Bulletin Number by Brand on Page 2.
Time units: 4 units
Affected market(s): US, Canada, Europe

Description/Background:

We have received reports of the engine pulley bolt backing out of the engine crankshaft. The engine pulley could become loose or detached from the engine. Damage to the drive belt is possible if this occurs. This bulletin describes how to install a longer engine pulley bolt.

Part Ordering Information:

Old engine pulley bolt part number: 532179617
New engine pulley bolt part number: 532191760*

***Model ST 76EP (961910060) will also require washer 532851074 (see page 2).**

Affected serial numbers:

All units produced between 6/1/2014 and 9/30/2015 are affected. The serial numbers include any from **060114MXXXXX** to **093015MXXXXX** for the affected models (see page 2).
